

## Paint Express: HYDRO structuring pastes

Adding of different Structure pastes to the HYDRO Colour lacquer systems **COOL-COLOR** HB 6528x(gloss level)-(colour tone), **COOLPRO-COLOR** HDB 5428x(gloss level)-(colour tone) and **PERFECT-COLOR** HDB 5434x(gloss level)-(colour tone) achieves differing pearl structure effects. The result is a pleasant feel and visually interesting effects. This lacquer system's already exceptional surface properties are further improved by the HYDRO Structure additive with little extra effort.

This creates particularly scratch- and scrub resistant surfaces.

### Amounts added depending on the texture

| Basecoat coloured lacquer                                                                                                                                      | HYDRO Structure additive | Addition quantity |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|-------------------|
| COOL-COLOR HB 6528x(gloss level)-(colour tone),<br>COOLPRO-COLOR HDB 5428x(gloss level)-(colour tone)<br>or PERFECT-COLOR HDB 5434x(gloss level)-(colour tone) | HZ 95 velvety            | 10%               |
|                                                                                                                                                                | fine                     |                   |
|                                                                                                                                                                | HZ 96 fine               | 5%                |
|                                                                                                                                                                | HZ 97 medium             | 8%                |
|                                                                                                                                                                | HZ 98 coarse             | 10%               |

This way modified colour lacquer should be additionally marked with "pearl effect".

### Use:

- Stir all materials carefully before use.
- Stirring by hand ensures good incorporation of the Structure paste into the colour lacquer.
- If you use an agitator, please ensure that the material does not become foamy due to over-stirring.
- In the case of COOLPRO-COLOR and PERFECT-COLOR, the Structure paste must be mixed in **prior to hardening**.
- Finished Pearl structure lacquers can be diluted as necessary.
