

Maintenance: Maintenance instructions for coated glass

Glass coatings created using polyurethane or HYDRO glass lacquers are very hard-wearing and do not require special care.
Only the general sensitivity of coated surfaces to scratching must be considered for cleaning and maintenance.
Dry, hard cloths or the like should therefore not be used.

Instructions for cleaning and maintenance:

Cleaning cloths:

- Use suitable (soft) micro-fibre or leather cloths.

Cleaning agent:

- Please only use a mild household cleaner, especially on the coated side, and observe the manufacturer's instruction regarding the cleaner's concentration.
- Harsh household cleaners, abrasive substances and glass cleaner (alcohol-based spray cleaner) are not suitable.
